

REACH Regulation NEFAB's answer

Salbris, 2008/10/06

Subject : REACH Regulation, rev1

Dear Sir, Madam.

Please take note that Nefab Packaging France has begun a process for all Nefab products affected by the new REACH regulation.

The aims of REACH vis-à-vis articles produced or imported from outside the European Union

- Registration of substances : substances found in articles greater than 1 ton per year destined for disposal under normal conditions or due to reasonable use.
- Notification of substances : if the presence of substances come into the field of authorization (CMR1&2, PBT, vPvB,...), and if the quantity is greater than 1 ton per year and concentration in the article greater than 0.1% mass/mass.

Concerning the products we supply :

1. **ExPak, RePak boxes**: not concerned by Notification.
2. **LogPak – wooden collars** : not concerned by REACH.
3. Polyethylen and/or polyurethan **foam** : not concerned by REACH.
4. **VpCI articles** : The pre-registration has been made by the supplier, which allows Nefab to keep supplying these products during the registration period.
5. Other articles : not concerned by Notification, not concerned by REACH.

Please do not hesitate to contact us for any further information.

Yours faithfully.
